About The Club

About The Club

"Empowering the next generation of investment professionals through hands-on experience and industry connections"

Our Mission

We strive to provide students with unparalleled access to the private equity and venture capital industry through practical experience, networking opportunities, and comprehensive educational programs.

Why PE&VC?

Private markets have become one of the fastest-growing areas of global finance, with assets under management surpassing **\$13 Trillion** worldwide. The shift from public to private capital has created a growing need for professionals who understand how value is built, not just traded.

Comillas PE&VC Fund: A Student-Led Investment Analysis Platform

2024

FOUNDED

16+

ANALYZED DEALS

100+

DEAL ANALYSTS

The Comillas PE&VC Fund replicates the full private-markets investment process. Our analysts start by assessing macroeconomic and industry dynamics, identify attractive opportunities, and build entire deal cases from the ground up. Each project includes financial analysis of target companies, deal structuring (debt and equity design), and tailored value-creation plans. Finally, the teams evaluate exit outcomes and investment performance, mirroring the workflow of a real private equity or venture capital fund.

Competitions

FINECT TALENT 2025

Nine of our analysts participated in Finect Talent 2025, a national competitions that brings together university teams to design and defend investment strategies under the mentorship of leading asset-management professionals. After several rounds of analysis and presentations, one of our teams – Marco Martínez, Jaime Sanz-Pastor, and Alexander Stubbe – has reached the Grand Final taking place this November.

GLOBAL TRADING CHALLENGE 2025

Bloomberg

Our analysts are competing in the Global Trading Challenge 2025, an international competitions where university teams manage a simulated portfolio of \$1 million through the Bloomberg Terminal. The challenge tests their ability to design and execute trading strategies in real market conditions, putting their analytical and financial skills to the test against teams from all over the world.

GAME OF TRADERS

bankinter.

Some of our analysts are taking part in the Bankinter Game of Traders, a Spanish nationwide stock-market simulation where participants trade real-time with virtual capital. The competition offers a dynamic, hands-on way to strengthen market understanding and decision-making under pressure, further connecting our analysts with the practical side of investing.
